## PROJECT EXPERIENCE

---

### **Bob's Computer Repair Shop (2024)**

- Created a robust web application for employees to generate and print invoices for customer service transactions.
- Utilized Bootstrap to ensure a responsive and user-friendly website experience across various devices.
- Developed MongoDB schemas to efficiently manage user information and invoice data.
- Performed thorough user testing to implement iterative improvements in the user interface and overall user experience.
- Demonstrated proficiency in real-time data updates, delivering an intuitive user experience and dynamic content management.

### **NodeBucket (2024)**

- Built a comprehensive task management application featuring secure user authentication.
- Applied Bootstrap to ensure the application is responsive and provides a seamless experience across all devices.

- Designed an interactive task page with drag-and-drop functionality, allowing users to effortlessly update task statuses from pending to completed.
- Leveraged MongoDB to facilitate real-time updates, ensuring that task information is always current and accurately reflected.

---
